

The NAEH as Part of the New Group of World Servers

There will be a struggle between people who are responsive to their souls and concerned for the wellbeing of others and those who are still functioning at the personal level. Those who are responsive to their souls will be able to express the higher mind and the values, virtues, and nature of the Soul. However, when people are functioning at the personal level, they will insist on a world that supports their efforts to pursue their selfish desires, even if the wellbeing of others is adversely affected. The personal preferences and interests of the little self will continue to dominate society.

Groups of light workers and disciples—members of the New Group of World Servers—are joining together to invoke the transmuting ray energies that dissipate selfish emotion-based glamour and illusion. NAEH is an important point of light, working as a group within the New Group of World Servers.

When the NAEH gathers, the unified group light is so bright it shines upward into the world of the Soul and the higher planes of light. It catches the attention of the Masters of the Spiritual Hierarchy, who in turn transmit the light and energies of the higher planes into the group light. This means that the light of the NAEH is capable of receiving higher energies and qualities than each member is able to receive individually. This leads to an accelerated rate of advancement and deeper realizations, as well as a greater capacity to help advance mankind.
